

DURASOL ENERGI: MARCHING TOWARDS BECOMING AN ENERGY LEADER

As India celebrates its Independence day on August 15th, Durasol Energi, a brand of Intelenergi Global Pvt Ltd., proudly stands at the forefront of the nation's journey towards a more sustainable and technologically advanced future in the energy Space. Embracing the spirit of "Make in India," Durasol Energi is redefining power generation and energy management in the Renewable Energi sector with a commitment to Improving the quality of Life globally.

Driving Indianness in Energy and Ecology

Durasol Energi is already making waves internationally, having gained acclaim in over 35 countries, including regions such as the Middle East, Asia, and Africa. Now, the company is expanding its presence to European and Indian markets as well. On this significant occasion, Durasol Energi reflects on its role in advancing technological and environmental progress. The company's integration of cutting-edge technologies into the energy sector is setting new standards for efficiency and sustainability, aligning with India's aspirations of becoming Global Energy Leader.

In addition to its modern manufacturing facilities in India, specializing in Energy Storage space and solar water pumping systems, the company also has offices in Dubai, Nigeria, and a factory in Sudan.

To fuel the growth, the company boasts a state-of-the-art global R&D center that ensures its products meet some of the highest industrial standards and comply with CE and UL certifications. Intelenergi has also been recognized as a Star Export House by

We are committed to enhancing global quality of life through innovative and sustainable solutions.

Founder & Managing Director,
Intelenergi Global Pvt. Ltd.

the Government of India. They have already secured 25+ brands registration globally, 6 design approval and patents under IPR.

Challenging Global Standards

Intelenergi is making remarkable strides, surpassing global competitors, including China, in technology and power generation.

DURASOL®

Energi

Through substantial investments in research and development, the company has pioneered innovations in renewable energy solutions and optimized power generation practices. These advancements enhance efficiency, reduce carbon footprints, and position Intelenergi as a global leader. By challenging China's dominance, Intelenergi sets new benchmarks, demonstrating its role as a trailblazer in the industry.

A Commitment to a Sustainable Future

As India celebrates its Independence Day,

Durasol Energi is proud to contribute significantly to India's mission of a developed Bharat by 2047. The company's dedication to technological innovation and sustainable power generation underscores its role in fostering a prosperous and environmentally friendly India.

Intelenergi's efforts align with the nation's broader development goals, balancing economic growth with ecological responsibility, reflected in the principles of Niti, Nishta, Nirnay, Nyay, and Nivesh.

A Vision for the Future

Today India is little behind China and some European companies in offering indigenous energy storage products. They reaffirm the commitment to driving progress through technological advancements and bringing world class indigenous energy storage products and create leadership position in this segment.

On this Independence Day, the company symbolizes India's dedication to a future where innovation and environmental stewardship lead the way. As the nation celebrates its journey of growth and independence, Intelenergi's efforts are shaping a new era of energy and technology, contributing to a more sustainable and prosperous India.

They have planned for celebrating the Independence Day in all 35 countries they operate in and let world witness the Tiranga. 'Jai Hind'.
